WHO WE ARE:
The Biochemistry program is administered by the Departments of Chemistry and Biological Sciences. The degree program is designed to prepare students for a professional career in biochemistry. The BS degree in Biochemistry provides the best program for further graduate study in biochemistry and professional schools of dentistry and medicine.

WEBSITE: chem.uic.edu

DEGREES OFFERED: Bachelor of Science

POTENTIAL CAREER OPTIONS:
Potential career options include graduate study in biochemistry, chemical biology, and related areas of chemical sciences.

MOST POPULAR COURSES:
Chemistry 452: Biochemistry I

ADDITIONAL INFORMATION:
This curriculum includes training in all aspects of the chemical and biological sciences with an emphasis on preparing students to apply their knowledge and skills in understanding, analyzing, and conducting research in biochemistry, including the fundamental chemistry of molecular biology.

WHERE YOU CAN FIND US:
Biochemistry Program
Science and Engineering South
