WHO WE ARE:
Poland has the fastest growing economy in Europe. Russia continues to be a key player in all world affairs. Birthplaces of Copernicus and Dostoevsky, Lenin and John Paul II, Poland and Russia have determined some of the most influential contemporary social and cultural events and movements. In this context, the undergraduate majors and minors in Polish and Russian languages and cultures are a passport to better understanding of our global culture and history. Our focus is on modern (20th and 21st century) literature, culture, film, and media, in national and international contexts. Students can also update their knowledge about the geo-political situation in Eastern Europe. In addition, our first-rate faculty offers courses in Polish-Jewish studies, Lithuanian culture, and on the history and culture of Central Europe. We provide language instruction at all levels in Polish and Russian, and, due to the Hejna Endowment in Polish Language and Literature, we support our best students with scholarships, including the Summer Program in Krakow, Poland.
