WHO WE ARE:
The Neuroscience program is directed and taught by the Laboratory of Integrative Neuroscience (LIN), an interdepartmental group of faculty with shared interests in neuroscience. Once undergraduates have fulfilled their basic course requirements, the program provides students with an opportunity to concentrate on electives and independent research in one of the four areas: Biological Sciences, Psychology, Chemistry or Philosophy. Thus, each student graduates with a major in neuroscience but that major will have a distinctive flavor.

WEBSITE: lin.uic.edu

DEGREES OFFERED: Bachelor of Science

POTENTIAL CAREER OPTIONS:
Potential career options include: medicine, neuroscience research in academia (neurobiology, psychology) or private industry, sales, and teaching.

ADDITIONAL INFORMATION:
Upon acceptance, if students would like to meet with one of the advisors to review credits and to plan a path to graduation with a degree in Neuroscience, advisors will meet in one-on-one appointments.
